TO WHOM IT MAY CONCERN

RE: GLX INNOVATIONBS AND TECHNOLOGIES

This is a letter of verification and validation on the Technologies, Products and Preventative methodologies as espoused by GLX Innovations and Technologies.

In my detailed analysis, I have checked the laboratories, research data, and deployment methodologies of GLX Innovations and Technologies. And end to end processes of effective delivery.

In the area of Training, I have examined the training materials, methodologies and its cohesiveness to the Pestology and prevention curriculum. All the materials and processes of delivery are of the highest standards in North America and therefore are replicable around the globe very effectively.

GLX adopts the cutting edge technologies, knowledge transfer and preventative pest methodologies that are proven in the North American Markets.

I can vouch in my professional capacity that GLX has a track record of a successful and innovative solutions provider in the field of Arco petrology.

Truly,

Dr. Iqbal Dhanju
