To Whom it May Concern,

This letter is in reference to GLX INNOVATIONS & TECHNOLOGIES. We have recently purchased a resort in Zanzibar, Tanzania and would like to invite Mr. Gillani to set up a system of sanitation and pest management at this new property. I have used his services at another property, the Clarion Inn & Suites in Belleville, Ontario, Canada for the past 23 years and have been quite happy with his level of service and expertise. As there is no company here in Zanzibar that can set up such a system tailored to the special needs of the hospitality industry, I would like to invite Mr. Gillani to my new property in order to help with this new endeavor.

Specifically, I would like Mr. Gillani to set up a system of sanitation and pest management unique to the challenges posed by the tropical hospitality industry. In terms of services, we require Arcopestology services for pest protection during construction as we are new property under renovations. In addition, once renovations have been completed, a dynamic pest management system would need to be put into place and in-house staff would need to be trained. Long term, we would like to set up a regular training program at our resort to ensure our quality of service and product to our guests.

If you require any further information, please do not hesitate to contact me at alanjinah@gmail.com.
